Discussion on changes made in Ist sem.

Proposed syllabus for Ist sem was accepted with minute changes in hard core (Microbiology) unit IV plant microbe & plant pathogen interaction was removed due to repetition. Similarly soft core (Bioanalytical techniques); radioactive isotope from unit II is shifted to unit IV, justifying unification of 15 hrs & 12 hrs separately.

Discussion on changes made in IInd sem.

Proposed syllabus for IInd sem was accepted with minute changes in soft core (metabolism) unit I photosynthesis & regulation shifted to unit III, removal of secondary metabolites from unit III due to irrelevancy as the paper has become soft core. Similarly soft core (Bioethics, etc, entrepreneurship) unit I requires modification with more entrepreneurship.

Members also reasoned that open elective paper optional - recombinant DNA technology could be a concrete, in future can be replaced with more simplified.

Discussion on changes made in IIIrd sem.

Proposed syllabus for IIIrd sem was accepted with minute changes in soft core (Biostatistics & Bioinformatics) unit II content needs rearrangement of proteomics & genomics separately. Members also reasoned that open elective paper optional nano technology could be a concrete, in future can be replaced with more simplified.

Discussion on changes made in IVth sem.

Proposed syllabus for IVth sem was accepted with minute changes. Members advised to keep weightage more for project or give their suggestions in the IVth sem.
