concepts are explained concisely.

- In semester II, title of the paper is changed as Bivariate regression and discrete probability distribution as regression analysis is based on two variables.
- In unit-III, delete relationship between Hyper-Geometric distribution and Bernoulli distribution as it is a repetition.
- In semester III, under unit III instead of properties of MLE and moments method of estimation, it is decided to discuss the properties of these estimators without proof as it improves mathematical skills.
- In semester IV, under unit III, definition of sampling distribution like Student's t , F and χ^2 using pdf only and their properties like mean, variance and mode to be discussed for better understanding of sampling distributions.
- In Semester VI, under the elective paper remove chain based index number and circular test and under unit III instead of extrapolation and intrapolation, Multivariate analysis is to be incorporated as it is used widely in IT sectors.
- Under elective paper, applied regression analysis the concept of Non-linear regression was included as it is used to estimate parameters
